ENRICHMENT TERM I September 6, 2011- November 18, 2011

What is Enrichment?

The MCCPS Enrichment Program is a daily 45-minute period in which parents, community volunteers, and staff work with students on a wide variety of projects and activities. The Enrichment program began in the school's first year as a means for parents to take an active role in the learning environment of their children and for students to learn from their extended local community. Since then, it has grown to become an integral component of the school's core commitment to community partnerships and parent involvement.

The connections created are what make Enrichment so special. In addition to the learning gained from the project, or activity, students learn about themselves, their skills and talents, and about members of their community.
